SUMMARY

Full stack developer and IT undergraduate (FAETERJ) who **builds and runs a real system in production**. I own **Hub Atlético Dragões**, the platform used by FAETERJ's IT students, with a Java 21 / Spring Boot back end, PostgreSQL, **1,275 automated tests** and CI/CD with GitHub Actions on Oracle Cloud. Security is my edge: **Ethical Hacking certification (HackerX)**, ongoing training in the **Hackers do Bem** program (Brazilian Ministry of Science and Technology / RNP) and hands-on work with JWT, OAuth2, CSP/HSTS, rate limiting and LGPD (Brazil's GDPR). 6+ years of work experience in customer service and leadership (assistant manager of a 700+ customers/day operation) and C2 English. Looking for an **internship or junior role** in software development, infrastructure or information security.

PROJECTS

Hub Atlético Dragões · Full Stack Developer (own product) 2025 – present

atleticadragoes.com.br · Java 21, Spring Boot 3.5, Spring Security, PostgreSQL 15, Flyway, Docker, Caddy, Oracle Cloud

- Designed, built and maintain the web platform (PWA) for FAETERJ's IT students, with **80+ active accounts**: grades and pass simulator, class schedule, study content, digital student ID with verifiable QR code, room booking, e-sports tournaments and an AI assistant.
- Back end with **~290 REST endpoints**, 46 JPA entities and a schema versioned in **46 Flyway migrations; 1,275 automated tests** (JUnit 5 and Mockito).
- Migrated the infrastructure from AWS EC2 to Oracle Cloud, **cutting the monthly cost from ~R\$170 to zero** with about 2 minutes of downtime; set up CI/CD with GitHub Actions + GHCR and daily backups to Cloudflare R2 with tested restores.
- Security and privacy: JWT + BCrypt, Google sign-in (OAuth2), default-deny route protection, rate limiting, CSP/HSTS headers, email verification, enumeration-resistant password reset, and user data export and deletion. In my own security reviews I found and fixed a stored XSS and an endpoint that exposed data without authentication.
- Integrated an AI assistant (LLM via Groq) with a deterministic FAQ and a cache that answer the most common questions at no AI cost, graceful degradation when the quota runs out and a daily health check of the model.

OmniRate · Full Stack Developer (personal project) 2025

Java 21, Spring Boot, React 18, Vite, PostgreSQL (Neon), Docker Compose, Caddy, Oracle Cloud

- Pop culture review platform (movies, series, games, books, albums and comics), which I deployed on Oracle Cloud with Docker Compose and Caddy.
- JWT authentication with BCrypt, Flyway migrations, LGPD-compliant terms acceptance and a React 18 + Vite front end.

WORK EXPERIENCE

Estarpar · Parking Operations Controller · Petrópolis, RJ Nov 2025 – present

- Operate access control and traffic monitoring systems in a high-traffic facility, resolving incidents in real time according to security protocols.
- Completed Academia Estapar's cybersecurity awareness track (social engineering, phishing, malware and insider threats).

Mega Lanches · Assistant Manager · São Paulo, SP Feb 2022 – Dec 2023

- Led the operation of a restaurant serving **700+ customers a day**: team scheduling and delegation, resource management and process improvement focused on communication and efficiency.
- Promoted after working as a Crew Member (Aug 2018 – Dec 2020): fast customer service and equipment operation with a focus on quality.

Odonto Company · Receptionist · Petrópolis, RJ: patient service and scheduling. Mar 2025 – Jul 2025

CIEE · Young Apprentice · Petrópolis, RJ: customer service and administrative support. Jun 2024 – Mar 2025

■ EDUCATION

FAETERJ Petrópolis · Associate degree in Information and Communication Technology Mar 2024 – ongoing

- Academic Council member and President of **Atlética Dragões**, the student association (May 2024 – present): I represent students before the school board and run events and championships, including the 1st Copa Dragões de Valorant (6 teams), managed through the Hub.

Serratec · Technology Residency: Python, IoT, Artificial Intelligence and Cloud May 2025 – Jul 2025

Intensive program with hands-on team projects.

■ COURSES AND CERTIFICATIONS

- **Hackers do Bem (MCTI / RNP)**: national cybersecurity training program, **in progress since Apr 2026**.
- **Ethical Hacking & Cybersecurity, HackerX** (final certification, Mar 2026): 17 modules, including XSS, SQL injection, vulnerability scanning and reporting, sniffing and MITM, password cracking, Wi-Fi WPA/WEP and AI for security.
- **Oracle Next Education (Oracle + Alura)**: Beginner Programming Track G8, 70 h (2025): JavaScript logic, responsive HTML/CSS, Git and GitHub.
- **Fundação Bradesco**: Information Technology Security (12 h) and Brazilian Data Protection Law, LGPD (2 h), 2024.
- **Hashtag Treinamentos**: AI Agents Immersion (8 h), 2026.
- **EF SET English Certificate**: C2 Proficient, 82/100 (2024).

■ TECHNICAL SKILLS

Languages	Java, Python, JavaScript, SQL
Back end	Spring Boot, Spring Security, REST APIs, JPA/Hibernate, Flyway, JUnit 5, Mockito
Front end	HTML, CSS, JavaScript, React 18, Vite, PWA
Data	PostgreSQL (modeling, indexes, versioned migrations)
Cloud and DevOps	Oracle Cloud, AWS EC2, Linux, Docker and Docker Compose, Caddy, GitHub Actions (CI/CD), Git, Cloudflare R2
Security	OWASP Top 10, web pentesting, OSINT, JWT/BCrypt, OAuth2, CSP/HSTS, LGPD
AI	LLM integration (Groq, Anthropic), RAG, AI-assisted development
Spoken languages	Portuguese (native), English C2 (EF SET 82/100), Italian A1

Available for on-site, hybrid or remote work. Full list of certificates at portfolio-ten-livid-56.vercel.app/certificados
